

Sudden North is a veteran-led engineering firm delivering secure software, cybersecurity, systems integration, and hardware prototyping. We give prime contractors and program offices a small, accountable team that understands defense delivery from requirements and estimates through test and sustainment.

SDVOSB SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS

/ CORE COMPETENCIES

Software engineering + Full-stack web, mobile, and cloud applications + Mission and business system modernization + Data pipelines and AI-enabled workflows + DevSecOps and CI/CD	Cybersecurity + NIST SP 800-171 / CMMC readiness support + Secure architecture and threat modeling + Identity, access, and zero-trust patterns + AI integration risk assessment
Systems engineering & integration + Requirements, interfaces, and architecture + API design and systems integration + Workflow automation + Legacy system modernization	Hardware & prototyping + Rapid concept prototyping + Edge computing and sensor integration + Technical validation and test + Hardware–software integration

/ DIFFERENTIATORS

Defense program experience

Founders have led, estimated, and proposed multimillion-dollar defense software efforts on strategic and airborne electronic warfare programs.

Security in the foundation

Cyber is designed into the architecture and delivery pipeline, not inspected in at the end.

Engineering and business fluency

Senior software and electrical engineering leadership paired with MBA-level cost, schedule, and proposal discipline.

Small and accountable

Direct access to the founders, clear ownership, and visible progress from the first week.

/ HOW WE TEAM

01 Specialty subcontractor

Defined software, cyber, or systems workshare inside your program, staffed by senior engineers who need little ramp-up.

03 Surge & specialty capacity

Focused help when a program needs depth fast: modernization, integration, test, or security hardening.

02 Proposal & pursuit partner

Technical volume support, solution architecture, and bottom-up estimates from people who have written them.

04 Prototype & R&D partner

Rapid prototypes and technical validation that retire risk before a program commits to a full build.

/ COMPANY DATA

BUSINESS	SDVOSB
BASED IN	New England

/ NAICS CODES

541511	Custom Computer Programming Services
541512	Computer Systems Design Services
541519	Other Computer Related Services
541330	Engineering Services
541715	R&D in the Physical, Engineering, and Life Sciences

/ LEADERSHIP

Shawn-Patrick Bland

Co-Founder. Retired U.S. Navy veteran and senior software engineer with an MBA. Has developed, managed, estimated, and proposed multimillion-dollar defense software efforts.

Ben Martin

Co-Founder. Chief engineer with an electrical engineering background and deep experience in complex airborne defense systems.
